

Project No. 102411EM
\$1,736,640

EQUIXP's technical expertise lended value to a project that required the supply of 8 specialized oil-free reciprocating air instrument compressors and 5 vertical air receivers to be utilized on a Power Plant in Nigeria.

Throughout the critical process of engineering, every step was carefully examined to ensure the customer would receive a product that would not only operate in a harsh environment but moreso thrive for many years to come.

The components utilized the best quality from notorious manufactures such as Ingersoll Rand, Allen Bradley, Ashcroft, United Electric and Neo-Dyne.

Overall, the customer was highly impressed with EQUIXP's abilities and teamwork and additionally encouraged to do much more business in the near future as a client-partner of EQUIXP.
